

**COLUMBIA**  
C O A T I N G S

# COLUMBIA COATINGS

## Description:

**AllPrep** is a non-flammable, multi-purpose acid based cleaner and prepaint conditioner for most metals.

**AllPrep** cleaning and conditioning chemical leaves the surface corrosion free and chemically clean.

**AllPrep** can be used to deep clean and etch a metal surface prior to paint or to prepare a surface for subsequent chemical coating like that produced on zinc, steel and on aluminum surfaces. Chemical coatings offer the best affordable substrate for both paint adhesion and under paint corrosion resistance.

## Application:

Apply via dip, brush, or spray with a variety of equipment.

## Directions of Use:

- Dilute product in a 1:10 ratio with water when cold & 1:20 ratio when hot
- Spray on part
- Rinse off
- Dry
- Powder coat

For heavy deposits of soil, use **Super Degreaser** in a 1:10 ratio with water, then rinse off. Then, apply **AllPrep** as stated above.

## Benefits:

Provides cleaning, degreasing, and etching, all in one step.

Aids in removing mill scale

Aids in removing rust and heat treat oxidation

Contains iron phosphates
